

# Managed Accounting Support

## Expand Your Accounting Options

Accounting is not as simple as it used to be. Increased regulations and tax laws, the use of technology and information security demands are more complex. It can be difficult for a small, internal accounting group to remain trained and current on these matters. Let our firm's expertise and professionals handle your accounting for you.

### What Is Managed Accounting?

It is a method of outsourcing some or all of your accounting functions. All of our professionals are local and work at our offices and yours.

### What Are the Benefits?

Why hire, train, manage and fire accounting staff? With WRDR there are no benefits, payroll taxes or turnover to handle. The most important advantage of Managed Accounting is you get timely and accurate information to run your operations.

### Do You Provide CFO / Controllership Services?

We support in-house CFO and Controllers so they can focus on strategic leadership, relationships and "big" picture needs. In organizations that do not need a full-time financial executive or who are downsizing that position, we can assume that role as part of your Managed Accounting solution.

### Some of Our Services Include:

- General Ledger Management
- Accounts Payable & Receivables Processing
- Payroll Coordination
- Cash Management & Cash Flow Projections
- Income Statements & Balance Sheets
- Bank Reconciliations
- Tax Return Preparation & Filings
- Budgets, Forecasts & Variance Analysis
- Management Team Presentations

### Working With Your Auditors

You do not have to switch auditors. Your auditors will love working with us because we provide them a clean set of complete records. As your accounting solution, we could not conduct an audit for you due to independence requirements.

## Why Do You Need This?

Insightful accounting can make a significant impact. You need this if you are having delays in receiving information or think you should be getting better results. Let us conduct a no-cost assessment so we can understand how you are operating and provide a proposal specific to your needs.
